"Partnering to make recycling strong through economic and environmentally sound solutions"

Jaffrey, NH

Congratulations for being such active recyclers!

Below please find information on the positive impact your recycling has had on our environment.

The recyclable materials listed below were sent to market to be remanufactured into new products through your non-profit recycling organization, the Northeast Resource Recovery Association.

Recyclable Material	Amount Recycled In 2018	Environmental Impact! Here is <u>only one</u> benefit of recycling materials rather than manufacturing products from virgin resources
Aluminum Cans	21,700 lbs.	Conserved enough energy to run a television for 2,209,060 hours!
Paper	41.3 tons	Saved 703 trees!
Scrap Metal	65.6 gross tons	Conserved 183,800 pounds of iron ore!
Tires	14.4 tons	Conserved 9.5 barrels of oil!

Avoided Emissions:

Recycling uses much less energy than making products from virgin resources, and using less energy means fewer greenhouse gases emitted into the atmosphere.

By recycling the materials above, you have avoided about **561 tons** of carbon dioxide emissions
This is the equivalent of removing **119 passenger cars** from the road for an entire year!
