

Is the streetlight near your home not working?

Over the last several weeks, the DPW has reported many inoperable streetlights to Eversource for repair, but we need your assistance.

If there is a streetlight near your home that is not working, please help by reporting it. There are two ways of reporting the street light problem.

- Send the DPW an email. There is a link on the highway department webpage

http://www.townofjaffrey.com/Pages/JaffreyNH_DPW/highway/index

or...

- Notify Eversource directly at the following link under “Programs and Services” (also on DPW home page).

<https://www.eversource.com/Content/nh/residential/programs-services/street-light-repair-request>

When reporting, please try and be specific as to the location of the light (address, pole number, cross street if on corner or is it near an address).

The town is paying an electric bill on that light whether it is working or not.

Thanks for your help!
