## Contracts for Library Services

---

Chapter 202-A:4-b of the New Hampshire Revised Statutes Annotated permits the contract for library services: *“Any town may contract with another town or city, or with an institution or other organization, for any library service. If a town meeting votes to enter into such a contract, the town shall raise and appropriate sufficient money to carry out the contract.”*

The Jaffrey Public Library is willing to provide library services to other municipalities through annual contract arrangements.

The annual fee for services is determined by the Library Director, as agent for the Board of Trustees. The calculation will consider the following criteria: population size, demographics, availability of existing town library services, and anticipated usage.
