Jon Frederick, Town Manager  
Town of Jaffrey  
10 Goodnow Street  
Jaffrey, NH 03452

***Re: Comcast Response to RFP For Broadband Internet Improvement Implementation in Jaffrey***

Dear Mr. Fredrick:

On behalf of Comcast, we are pleased to submit the enclosed response to the RFP for Broadband Internet Improvement Implementation in the Town of Jaffrey.

Currently over 2800 passings in Jaffrey have access to our leading products and services. Comcast customers in Jaffrey have the same suite of services available to them, including our broadband speed tiers as Comcast customers in Manchester, Nashua and Boston.

Included in our response are the following documents:

- RFP Response Cover Sheet
- Comcast Broadband Expansion Project Proposal
- Attachment – Price Lists
- *Attachment – List of currently unserved houses*

**Key Contact for Proposal:**

Bryan Christiansen  
Sr. Manager of Government and Regulatory Affairs, Comcast  
54 Regional Drive  
Concord, NH 03301  
[Bryan\\_Christiansen@cable.comcast.com](mailto:Bryan_Christiansen@cable.comcast.com)  
617-279-6956

We appreciate the opportunity to respond to the RFP and look forward to partnering with the Town.

Sincerely,

---

Timothy Kelly  
Vice President, Government & Regulatory Affairs  
Comcast Greater Boston

**Comcast Response to  
Request for Proposals for Broadband Internet Improvement Implementation  
Town of Jaffrey NH**

**Executive Summary**

Comcast is a leading communications provider in New Hampshire, offering high-speed Internet, video, voice, and mobile services for both residential and business customers. Since 1996, Comcast has invested approximately \$93 billion nationwide to develop and deploy a range of new technologies as part of our commitment to provide superior services to our customers. Comcast Cable Communications 2019 capital expenditures were in excess of \$6.9 billion. As a result, Comcast has established an industry-wide reputation for technology leadership, superior customer service and operational efficiency. The company has grown the Internet side of our business by continually enhancing speeds for residential and business customers and by marshaling our resources as the nation's leading provider to make significant investments in both customer and network support. Further, by converging with voice and video products, Comcast has created new and convenient ways for our customers to access the communications tools, entertainment and content they want, when and where they want it.

Comcast's advanced network has proven readily scalable, reliable and built for growth, enabling Comcast to not only meet but stay well ahead of consumer demand. In fact, Comcast has built, with private capital, a fiber backbone at the core of our network that stretches across the country with about 234,000 fiber miles, using the industry's most advanced optics/lasers and IP routing technologies. The company has invested significant resources in both local and national Network Operations Centers to ensure continual proactive monitoring of network health. The company also maintains large, locally based engineering and technical operations teams that work around the clock to maintain this level of reliability and to directly support the company's business and residential customers.

Comcast has a long history of working and partnering with local governments and organizations. Throughout our national footprint, Comcast partners with a wide range of established community organizations, leveraging their local expertise to deliver maximum benefits to our local communities and to build strong relationships in the neighborhoods, towns, and cities that we serve nationwide. In New Hampshire, we have been granted video/CATV franchise agreements by 114 communities. We are proud to have provided over \$15 million in cash and in-kind contributions to our local partners throughout the state since 2010, in the form of Comcast Foundation grants, sponsorships, volunteer hours, courtesy

services and in-kind donations. We have also provided \$340,000 in Leaders & Achievers Scholarships to graduating high school seniors in New Hampshire over the last eight years and helped to spruce up community sites each year during Comcast Cares Day, our nationwide day of employee volunteerism.

We continue to help communities address the digital divide, both with regard to broadband adoption and access. Comcast's Internet Essentials program is the largest and most expansive broadband adoption effort that a U.S. company has ever undertaken. Launched in the fall of 2011, Internet Essentials has connected more than 22,400 low-income New Hampshire residents and provided over \$650 million of cash and in-kind support nationally for digital literacy training and awareness. Internet Essentials tackles the broadband adoption gap (digital divide) head-on, addressing device availability, price, and media literacy. The program provides low-cost broadband service for \$9.95 a month; the option to purchase a full-service, Internet-ready computer for less than \$150; and multiple options for digital literacy training in print, online, and in person. This program is available throughout Comcast's footprint and will be available in any newly constructed areas.

Comcast's local employees have constructed and maintained thousands of miles of network infrastructure in New Hampshire, providing serviceability to over 458,437 homes and 49,720 business locations. Comcast employs over 2,000 people in New Hampshire. Since the beginning of 2018 alone, Comcast has expanded our network, building over 300 miles of new plant in New Hampshire. In neighboring states, Comcast has worked with both local and state officials to expand our plant in areas that are much more rural in nature. For example, Comcast has partnered with the Massachusetts Broadband Institute to expand broadband service in 9 partially served towns and to four completely unserved towns in western MA. In the State of Vermont, Comcast has entered into public-private partnerships with both the Vermont Telecommunications Authority and the Department of Public Service to extend our existing plant to reach unserved homes in remote areas.

While Comcast continues to review opportunities to expand our network, there are areas that do not fit the traditional economic model of prudent investment. The New Hampshire Legislature sought to address this problem by allowing municipalities to bond for funds to support broadband deployment in unserved areas. The Town of Jaffrey has indicated through its Request for Proposals (RFP) its willingness to partner with a private broadband provider and support the deployment of infrastructure in unserved areas with bond funds. With the Town's partnership, the economics of deploying broadband infrastructure to these unserved areas would be altered. In partnership with the Town, Comcast proposes to extend our existing plant in Jaffrey, as more fully described below.

## Statement of Qualifications

Comcast Cable is one of the United States' largest high-speed internet, video, and phone providers to residential customers under the Xfinity brand, and also provides these services to businesses. We also provide wireless and security and automation services to residential customers under the Xfinity brand. Comcast has invested in technology to build a sophisticated network that delivers the fastest broadband speeds, and brings customers personalized video, communications and home management offerings. Some key facts about Comcast are:

- Nation's Largest Video Provider: 20.4 million customers
- Nation's Largest Residential High-Speed Internet Provider: 29.4 million customers
- Nation's Third Largest Phone Company: 11 Million customers
- Combined Customer Relationships (US Based): 32.1 million
- Homes and Businesses Passed: 59 million
- Operations: 39 states and Washington, D.C.
- Locally in New Hampshire, Comcast offers service to more than 500,000 homes and businesses in 114 communities and has a local work force of more than 2,000

A copy of the Comcast Corporation Annual Report on Form 10-K for the year ending December 31, 2019, as well as other filings made with the Securities and Exchange Commission, is available via the link below or at [www.cmcsa.com](http://www.cmcsa.com) under "Financials." A hard copy will be provided upon request.

- Comcast's Greater Boston Region, directly responsible for customer operations in New Hampshire consists of a 10-member Senior Leadership Team situated in Hudson NH and Chelmsford MA with over 150 years of combined cable system leadership experience.
- In addition, Comcast's Northeast Division is headquartered in Manchester, NH. Virtually all Comcast Business customer calls are handled by NH-based staff in either Manchester or Hudson, NH.

## Specific Responses

### **Description of the Technology to be used and how it meets the requirements.**

Comcast's network is built for speed and fueled by innovation. It is capable of supporting next-generation broadband speeds and video technologies today and well into the future. We have built a fiber backbone at the core of our hybrid fiber coaxial cable network that stretches across the country with approximately 234,000 fiber miles, using the industry's most advanced optics/lasers and IP routing technologies.

Our network structure offers the most flexibility and the best economics now and into the future. We can surgically add speed, capacity and fiber to our networks in a smart and economically feasible way. Our existing network is built for innovation and will only get better as the rest of the Internet catches up and new technologies emerge. In 2015, we introduced Gigabit Pro, the industry's first residential 2Gbps service ever offered by a U.S. Internet Service Provider. In 2016, we began deploying DOCSIS 3.1, which combined with our Gigabit Gateway supports gigabit speeds over our HFC network throughout our New Hampshire footprint. Within eighteen months, Comcast became the largest gigabit broadband provider in the nation, providing faster speeds to more homes and businesses than anyone.

The industry continues to innovate, working through Cable Labs, a joint non-profit research and development laboratory, to develop the next iteration of DOCSIS, named 10G. The 10G platform is a combination of technologies that will deliver Internet speeds 10 times faster than today's networks and 100 times faster than what most consumers currently experience. This technological development will allow Comcast to offer 10 Gigabit service over its existing HFC network throughout our entire footprint. Not only will 10G provide faster symmetrical speeds, but also lower latencies, enhanced reliability, and better security in a scalable manner. Field trials of 10G begun this year.

We built one of the world's fastest, most powerful networks. Now we are making it smarter. Our customers' thirst for rich, dynamic online content is unquenchable. The smarter network is how we will ensure that they continue to get what they want, when they want it, over any device or service they want to use. This approach leverages cloud, backbone and architecture advancements to provide a faster, stronger and more flexible network to support the growing needs of the digital world. By optimizing traffic routing, and moving resources closer to where they are needed, the Smarter Network provides the key to managing ever-increasing traffic demands of today's Internet. It is not enough to network harder by building new capacity, now we must network smarter. The powerful combination of our broadband and WiFi network and the cloud is enabling us to invent and bring game-changing products to market, redefining how our customers enjoy entertainment, connect and communicate.

In recent years, we have transformed how we do business, which has enabled us to deliver a new generation of products to our customers, and become a leading media and technology company, in part, as a result of our investment in Comcast Labs. Comcast Labs is our cross-functional innovation and development team that identifies and creates the products of the future. Comcast Labs' engineers and developers leverage internal resources and work with vendors to develop technologies and applications that ultimately become new products and services. We are structured for agility and speed to support the fastest innovation cycle

Comcast has experienced and the industry has ever seen. Comcast Labs has already developed industry important industry innovations, including the talking guide and voice remote, next-generation guides, and many more.

### **Xfinity Internet Services**

Residential customers and small and medium-sized businesses have access to a wide array of Comcast's voice, video, and Internet services and packages that are designed to satisfy various usage patterns and demands.

Comcast has changed the Internet experience for millions of customers by providing the nation's fastest, most reliable Internet and in-home Wi-Fi speeds, in addition to online security for no extra cost. In October 2019, the company once again increased Internet speeds for the vast majority of its customers.

Nationally, over the past four years and across Comcast's service area, the company has quadrupled its overall network capacity and doubled its fiber miles, deployed gigabit speeds to more homes than any other Internet Service Provider, upgraded all of its speed tiers, and rolled out an entirely new class of gateways – the xFi Gateway and the xFi Advanced Gateway – that are designed for higher speeds and provide great Wi-Fi coverage.

Comcast also understands our customers' demand for portability and has created a Wi-Fi network that meets today's needs and stays ahead of tomorrow's consumer demands. Comcast delivers the fastest Wi-Fi network in North America and one of the largest in the world and provides the foundation our customers need to power their Internet-connected devices and experiences, in and out of the home. We deliver the fastest in-home Wi-Fi with the Xfinity Wireless Gateway, an all-in-one device that gives customers reliably fast speeds with the most coverage in their home so everyone can get online and do more on their devices all at the same time. Most Xfinity Internet customers can access more than 19 million outdoor and indoor Wi-Fi hotspots nationwide at no additional cost. The Xfinity WiFi App makes it easy to locate the hotspots.

Comcast's residential Internet service product, Xfinity Internet, is offered to our customers based on regional pricing plans. Thus, customers in rural New Hampshire are offered the same services at the same prices as customers in Concord, Manchester, Nashua and Boston. We've always said that as the Internet evolves, we will adjust our service to provide the best experience for our customers.

Comcast offers residential and commercial broadband customers a range of services designed to meet varying consumer needs. The broadband infrastructure Comcast would put in place in the Project Areas would provide all customers with the choice of seven (7) residential and six (6) business broadband options that exceed the minimum requirements for the RFP, as noted in the tables below:

Tier	Speeds	Standalone Pricing	With Xfinity TV or Voice Service
Performance Starter	25 Mbps/3 Mbps	\$49.95	\$49.95
Performance	100 Mbps/5 Mbps	\$77.95	\$64.95
Performance Pro	200 Mbps/5 Mbps	\$92.95	\$79.95
Blast!	300 Mbps/10 Mbps	\$97.95	\$84.95
Extreme Pro	600 Mbps/15 Mbps	\$102.95	\$89.95
Gigabit	1 Gbps/35 Mbps	\$107.95	\$94.95
Gigabit Pro	2 Gbps/2 Gbps	\$299.95	\$299.95

Comcast Business Tier	Speeds up to
Starter	25 Mbps/5 Mbps
Business Internet 75	75 Mbps/15 Mbps
Business Internet 150	150 Mbps/20 Mbps
Business Internet 300	300 Mbps/25 Mbps
Business Internet 500	500 Mbps/35 Mbps
Business Internet 1G	1 Gbps/35 Mbps

### **Xfinity Mobile**

Xfinity Mobile is available to Xfinity Internet customers and includes up to five lines of unlimited nationwide talk and text. Xfinity Mobile uses America's largest and most reliable 4G LTE network, along with the nation's largest WiFi network, to give customers a better wireless experience.

Unlike most wireless carriers, Xfinity Mobile gives customers the flexibility to mix-and-match data plans per user on an account, and switch any line on an account between data plans, at any time during their billing cycle. These features, plus the ability to access millions of Xfinity WiFi hotspots for free, are helping many Xfinity Mobile customers save hundreds of dollars per year on their wireless bills as compared with their previous wireless carrier

In addition, Comcast will offer residents and businesses subject to this proposal our full suite of products and services, including Xfinity video, over our X1 platform, Xfinity Voice, Xfinity Mobile and Xfinity Home, our home security and home automation service. And, Comcast Business will offer its entire suite of product offerings for small, medium and large businesses including 100 GB Ethernet. These products and service will be the same quality and price as those Comcast

offers in major metropolitan areas. Please see the attached Price Listings for the Town for a complete list of services provided.

**Credentials of Provider: Examples and references to other systems installed and managed**

As noted above, Comcast has built and manages systems in 39 states and the District of Columbia. In New Hampshire, we operate networks in 114 communities. We have also partnered with several states to deploy Comcast owned and operated broadband systems in unserved areas. For example, in the State of Vermont, Comcast participated in the Connectivity Initiative administered by the Department of Public Service under which Comcast has extended service to 280 homes that were previously unserved. In Massachusetts, Comcast partnered with the Massachusetts Broadband Institute to deploy broadband to 3,230 homes. In Virginia, as part of the Virginia Telecommunications Initiative and the Tobacco Region revitalization Commission Broadband Program, Comcast built our network to reach 7,700 unserved homes. Throughout Comcast's nationwide footprint, there are similar examples where Comcast has built or extended existing networks in rural areas.

We provide the following as a reference with respect to our work in Massachusetts:

Peter J. Larkin  
Special Advisor  
MA Executive Office of Housing & Economic Development  
Chair of the Massachusetts Broadband Institute

City of Rochester  
31 Wakefield Street  
Rochester, NH 03867  
Tel: 603-332-1167

**Proposal**

Comcast is pleased to submit this response to the Request for Proposal (RFP). Comcast is confident that the public-private partnership proposed below – in which Comcast would use a

combination of our own funds and a Town contribution to expand our cable plant – is the most efficient and effective way to bring broadband to unserved households in Jaffrey.

#### Proposed Expansion Areas

Comcast proposes to extend our network so that the identified homes have service available to them, without the need for an additional contribution to construction customer cable drops. Comcast would construct subscriber cable drops in accordance to our Franchise Agreement with the Town of Jaffrey. This would allow Comcast to install services to occupants of these homes upon request without requiring an additional contribution for construction. Based on Comcast's field surveys and measurements, there are a number of homes which have drops outside the normal standard installation. Comcast is amenable to discussing this aspect of the proposal with the town.

#### Terms of the Expansion Proposal

Based on a review of the data collected by our engineers, Comcast estimates the cost to extend our network to 176 passings in the Town would be \$2,240,000.00. Comcast proposes to invest an amount equal to the investment made under our typical business model. Under this proposal, the town would contribute \$1,976,000.00 to the project. The risk of any cost overrun would fall to Comcast; the town's investment would be capped at that amount. As discussed more fully below, Comcast would own, operate, maintain, and upgrade the plant as we would in areas of the State and Town Comcast already serves, with no additional contribution required from the town.

#### Comcast Proposed Line Extensions

Please see the attached spreadsheet for a list of the 176 addresses that do not currently have access to broadband speed from Comcast.

Comcast also proposes to take out a construction performance bond in the amount equal to the total construction cost. Additionally, during construction and afterwards Comcast would carry insurance and a performance bond in accordance with our Franchise Agreement with the Town.

Comcast anticipates that construction could be completed, and the locations activated within 2 years of the Town and Comcast agreeing to and signing the appropriate legal documents to finance and operate the proposed line extensions as well as Comcast's receipt of all necessary permits and licenses including those required to attach to utility poles. However, as you may know, there are factors that may delay a construction timetable, some of which are beyond our control. One such factor is make-ready work, the process by which the utilities make poles

ready for Comcast to attach our facilities. Comcast suggests we include in any agreement a provision that addresses “excusable delay,” defined as a make ready delay which exceeds 6 months from the date of a timely file pole attachment permit application. Comcast is amenable to discussing this recommended provision further.

### Agreement Structure

In the RFP, the Town noticed its intent to follow the requirements of New Hampshire SB 170 for pursuing the option of Town bonding upgrades to the broadband Internet infrastructure in order to meet the 25/3 specification. This law allows for the Town to bond and enter into a public-private partnership for these improvements. The Town further states its understanding that there are some requirements of the Bonding Bank and the State relative to use of bond funds and highlights the requirement that the Town own the bonded assets until the bond is paid off. However, the Town also notes that, even under a model where it were the owner the Town may be willing to transfer these assets to the partner in the agreement.

Comcast’s clear preference when entering into a Public-Private Partnership is to retain ownership of the infrastructure we build. There are many reasons for this, not the least of which is so that we may retain the ability to provide the best customer experience possible to our customers. To do so most effectively we need to control the end-to-end experience including, but not limited to, proactively monitoring the network for issues and resolving them before they even become evident to the customer; restoring service as soon as practical in times of emergency or inclement weather; and deploying timely upgrades and other technological innovations.

Comcast has reviewed the Municipal Finance Act in light of SB 170. Our reading suggests that municipalities have the option of either owning the network and collecting fees from third party providers, or entering into a “public-private partnership” with a particular provider. However, nothing in the Municipal Finance Act, as revised by SB 170, addresses the particular question of whether the municipality must own the broadband infrastructure that is built as a result of such a “public-private partnership.” SB 170 expands the authority of municipalities to issue bonds to finance the construction of private broadband networks on the condition that they serve unserved areas and will meet community needs. There does not appear to be a specific requirement for municipal ownership of the assets financed.

If the Town is interested in partnering with Comcast, and is amenable, Comcast suggests we meet with the Bond Bank counsel to discuss the ownership question. Should the Bond Bank concur with Comcast’s reading of the law, Comcast would enter into an agreement that would incorporate the terms herein.

### Alternative Proposal

If the Bond Counsel maintains a position that requires municipal ownership of the financed asset, Comcast would propose an alternative approach that is also consistent with the statements in the RFP – namely, a joint venture between the Town and Comcast that would make clear that the Town retains at least majority ownership of the network asset until the bond is paid off. The Town would also enter into an agreement with Comcast that would provide Comcast with exclusive use of the facilities during the term of the joint venture agreement for no additional fee. During the term of the agreement, Comcast would maintain and upgrade the network in the same manner as the Comcast solely owned networks in the State. The agreement would also include a mechanism for transferring ownership of the assets to Comcast upon extinguishment of the bond. Comcast is still reviewing with legal counsel and tax consultants the appropriate mechanism. If the Town decides to move forward with Comcast's proposal, Comcast will provide the Town with a draft agreement. Such agreement will likely acknowledge the end of the useful life of the deployed assets during the bond repayment period and the improvements and value added by Comcast during that same period.

Comcast looks forward to working with the Town to ensure all residents and businesses have access to Comcast's state-of-the-art products and services and can enjoy the full benefits the broadband service can bring.

Sincerely,

Timothy Kelly  
Vice President, Government & Regulatory Affairs  
Comcast Greater Boston Region

<sup>1</sup> Certain services available separately or as a part of other levels of service. Xfinity services are subject to Comcast's standard terms and conditions of service. Unless otherwise specified, prices shown are the monthly charge for the corresponding service, equipment or package. Prices shown do not include applicable taxes, franchise fees, FCC fees, Regulatory Cost Recovery, Public Access fees, other state or local fees or other applicable charges (e.g., per-call toll or international charges). Prices, services and features are subject to change. If you are an Xfinity TV customer and you own a compatible TV Box or CableCARD device, please call 1-800-XFINITY for pricing information or visit [www.xfinity.com/equipmentpolicy](http://www.xfinity.com/equipmentpolicy). © 2020 Comcast. All rights reserved.

<sup>2</sup> Requires a compatible modem and TV Box with remote, CableCARD or compatible customer owned device.

<sup>3</sup> Requires Limited Basic, TV Box, CableCARD or compatible customer owned device.

<sup>4</sup> Requires HD Technology Fee. Service to Additional TV with TV Box required for DVR Service on additional TVs. Not available to customers with Limited Basic only.

<sup>5</sup> Includes TV Box. Digital service tier on additional TV corresponds to digital service tier on primary outlet. HD programming requires HD Technology Fee. Not available to Limited Basic only customers.

<sup>6</sup> Not available to customers with Limited Basic only. Must subscribe to HD Technology Fee to receive HD programming.

<sup>7</sup> Requires TV Box, TV Adapter, CableCARD or compatible customer owned device.

<sup>8</sup> Requires Extra.

<sup>9</sup> Includes TV Adapter and remote. Digital service tier on additional TV corresponds to digital service tier on primary outlet. Does not include access to On Demand content, premium channels or channel numbers above 1000 unless otherwise noted on the channel lineup. Not available to customers with Limited Basic only.

<sup>10</sup> Price of Pay-Per-View and On Demand Movie or Event is displayed prior to the completion of the Pay-Per-View or On Demand ordering process.

<sup>11</sup> Requires Limited Basic and TV Box and remote or compatible customer owned device. Requires HD Technology Fee to receive HD programming.

<sup>12</sup> One month minimum purchase required. Not available in all areas.

<sup>13</sup> Contact 1-800-XFINITY for questions regarding equipment replacement charges.

<sup>14</sup> Standard installation includes installation of service line up to 125 feet from existing Comcast plant for the primary outlet only, except as otherwise required under local franchise agreement. Comcast does not perform custom installations, including installations which require in-wall wiring, wiring in extensive drop ceilings, basements, or crawl spaces.

<sup>15</sup> Includes standard installation of Xfinity TV, Xfinity Internet and/or Xfinity Voice and installation of additional outlets and wireless networking set-up if requested at time order is placed. Does not include installations of Xfinity TV only, Xfinity Home Security or Xfinity Gigabit Pro Internet.

<sup>16</sup> Requires a compatible modem. Unlimited Local and Long Distance package pricing applies only to direct dialed calls from home to locations included in the plan. Plans do not include other international calls. For more information regarding Xfinity Voice pricing go to <https://www.xfinity.com/Corporate/About/PhoneTermsOfService/ComcastDigitalVoice/cd/residential/>.

<sup>17</sup> A compatible modem is required. For more information regarding Xfinity Internet go to <http://www.xfinity.com/internet-service.html>.

<sup>18</sup> Not available in all areas. May require installation and non-refundable installation charge.

<sup>19</sup> Requires 2 year contract. Monthly rental of Gigabit Pro cable modem/router additional. Activation and professional installation fees additional. Gigabit Pro does not qualify for Comcast 30-day money back guarantee.

<sup>20</sup> Applies to Limited Basic and Xfinity Instant TV.

<sup>21</sup> Requires Xfinity Internet.

<sup>22</sup> Applies to Extra and above, and Sports & News.

<sup>23</sup> Requires Xfinity Instant TV.

<sup>24</sup> Xfinity Internet discount does not apply to Xfinity Instant TV.

<sup>25</sup> Requires Limited Basic with X1 TV Box and Xfinity Internet service.

<sup>26</sup> Streampix content available online only. HD content requires subscription to HD Technology Fee. Streaming to iOS device requires Xfinity TV app. Internet service with bandwidth of at least 600 Kbps and a subscription to Limited Basic. Streaming to laptop/computer requires equipment meeting minimum requirements posted at <https://www.xfinity.com/support/internet/requirements-to-run-xfinity-internet-service/>. Internet service with bandwidth of at least 600 Kbps and a subscription to Limited Basic.

<sup>27</sup> Requires Choice Double Play, Choice Limited TV or Choice TV. Cannot be combined with Limited Basic only.

<sup>28</sup> Requires Limited Basic, HD Technology Fee and TV Box, CableCARD or compatible customer owned device.

<sup>29</sup> Requires Limited Basic with X1 TV Box or compatible customer owned device and Xfinity Internet service.

<sup>30</sup> Franchise Costs are costs associated with providing public, educational and/or government access facilities and equipment and/or other related costs in your community.

<sup>31</sup> Equipment required at an additional cost. For additional information go to <http://www.xfinity.com/homesecurity>.

<sup>32</sup> Includes Xfinity Home Security and 24/7 Video Recording for up to 4 cameras. Equipment required at an additional cost. For more information on 24/7 Video Recording go to <http://www.xfinity.com/video-recording>.

<sup>33</sup> Requires Limited Basic TV service and a compatible Xfinity TV Box or customer owned device.

<sup>34</sup> Requires Limited Basic, HD Technology Fee, X1 TV Box with remote or compatible customer owned device. Sports Package subscriptions can be billed at once or in 4 total payments. Call 1-800-XFINITY to cancel subscription within 30 days of first charge to bill. Charges are non-refundable after 30 days of first charge to bill. Restrictions may apply.

<sup>35</sup> Requires Limited Basic, TV Box or compatible customer owned device with Xfinity Internet.

<sup>36</sup> Requires HD Technology Fee and TV Box or compatible customer owned device DVR Service with compatible customer owned device limited to 60 hours DVR Service.

<sup>37</sup> Requires TV Box, CableCARD or compatible customer owned device. 10 Hours DVR Service available with X1 TV Box (X1 TV Box requires subscription to one Genre Pack) or compatible customer owned device. Cannot be combined with Xfinity Voice or Xfinity Home Security.

<sup>38</sup> Requires minimum of Xfinity Performance Internet service and an Xfinity Flex Streaming device. Choice TV available for ordering through the Flex box only. 20 hours DVR Service available with X1 TV Box or compatible customer owned device. Not eligible for multiproduct pricing on Xfinity Internet, Xfinity Voice or Xfinity Home Security.

<sup>39</sup> Applies to installation, relocation and activation of additional outlets as well as upgrade/downgrades of service after initial installation of service and in-home visits. Does not cover installation or in-home visits for Xfinity Home Security.

<sup>40</sup> 20 Hour DVR Service requires Xfinity Internet Service and either an X1 TV Box or compatible customer owned device.

<sup>41</sup> SurePrice only available for 12 months to customers with Standard+ More, Select+ More, Signature+ More and Super+ More packages after qualifying 12 month promotional pricing.

<sup>42</sup> Requires 2-year contract. Monthly rental of Gigabit Pro compatible modem/router additional. Activation and professional installation fees additional. Gigabit Pro does not qualify for Comcast 30-day money back guarantee.

<sup>43</sup> Cannot be combined with Sports & News genre pack.

<sup>44</sup> Requires Extra.

<sup>45</sup> Requires Xfinity TV Latino, More Sports & Entertainment Package, Choice TV Double Play with one Genre Pack, Choice TV, or Extra or higher, Xfinity Internet, TV Box or compatible customer owned equipment.

<sup>46</sup> Not available to customers with Limited Basic only. Includes a customer-owned video equipment credit. An additional charge will apply for additional CableCARDs in the same device.

<sup>47</sup> Includes delivery of up to a total of three Get Started Kits for Xfinity TV, Xfinity Internet, or Xfinity Voice and a network signal test. Requires service address activation for Xfinity services within in the last 2 years. Does not include installation or relocation of outlets, equipment installation, setup or troubleshooting, or installation of Xfinity Home or Xfinity Gigabit Pro Internet.
